

# CARGO COMPARTMENT ACCESS STAND PARALLEL

Product Group 8022

## Key Benefits

This docking system is designed for modern aircraft, fitting both forward and aft cargo compartments. It's height adjustable, providing flexibility for various aircraft, and features fixed and adjustable railings for safety and fall protection. The large work platform offers ample space for mechanics and tools, while the extended platform section fits within the cargo door clearance. Made from a durable mix of aluminum and steel, it includes anti-slip aluminum steps, marine plywood flooring, and parking jacks for stability. Rubber padding protects the aircraft, and swivel castor wheels ensure easy mobility. The dock has a compact footprint for efficient operation and storage.

## Features

- Parallel positioning along the aircraft fuselage
- Height adjustable to fit multiple aircraft models
- Fixed railings and kickboards for safety
- Adjustable railing for enhanced fall protection
- Large work platform providing space for mechanics and tooling
- Durable construction using mixed aluminum and steel for optimal stability and mobility
- Aluminum steps with anti-slip surface for safety
