

# FAN BLADE CAROUSEL

Product Group 8051

## Key Benefits

The carousel is designed to accommodate all fan blades of one engine, with each blade organized in the correct order to prevent mismatching. Each fan blade is securely held in place by a dedicated clamping mechanism, ensuring stability during maintenance. The system offers an ergonomic working position for the maintenance engineer, allowing them to stay in the same spot while working. With the full 360-degree rotation capability, the engineer can efficiently access all blades, significantly reducing handling time.

## Features

- Fixed height carousel tailored to specific fan blade types
- Two fixed wheels with brake and two swivel wheels
- Dedicated storage boxes to organize removed items from each fan blade
- User-friendly rotatable lock pin to secure rotation
- Towbar included
