

NARROW BODY NOSE DOCK

Product Group 1009

Key Benefits

This combination dock is purpose-built for modern narrow-body aircraft, featuring a split left/right layout for easy maneuverability and height adjustability to accommodate both wheeled and jacked aircraft. Its ground mobility enables flexible positioning within the hangar bay, supporting efficient maintenance operations. The dock provides full access to the nose section, including the cockpit windows, forward passenger door, skin surface, and probes, with radome access made possible via integrated sliding panels. Adjustable floor and railing systems ensure safe and streamlined docking procedures. Optimized for maintenance workflows involving multiple mechanics and equipment, the dock maintains a minimal footprint for efficient space usage.

Features

- Height adjustable (optional: electric-hydraulic system)
- Marine plywood deck floor (optional: aluminum tearplate)
- Aluminum extendable floors and adjustable and plug-in railing following the aircraft contours for access and fall protection
- Rubber padding for aircraft surface protection
- Side gates for loading and off-loading of aircraft components, tooling and equipment
- Utilities and lighting for aircraft maintenance operations
