

TAIL DOCK FOR BUSINESS JETS

Product Group 3007

Key Benefits

This multipurpose dock is optimized for both horizontal and vertical tail maintenance, featuring an adjustable height system for a perfect fit across multiple aircraft types. It accommodates up to eight technicians simultaneously for efficient maintenance. The retractable floors enclose the aircraft tightly, ensuring a safe working environment. Its mobile design allows for easy relocation within the hangar, offering flexibility for maintenance tasks. The T-Tail Dock for business jet inspections and maintenance combines safety, convenience, and efficiency, reducing downtime and turnaround time significantly.

Features

- Bottom floor for vertical tail maintenance
- Top floor for horizontal tail maintenance
- Variable stair flight and a Fixed stair flight
- Included: retractable floor tool
- Included: towbar
- Optional: electric mover to easily drive or reposition the dock in the hangar
